Water-based transparent multi-coat varnish for furniture and interior finishing for industrial and professional use

	PRODUCT DESCRIPTION
General	Water-based transparent multi-coat varnish with very good transparency and wood accentuation which can be optionally applied as a single- or two-component coating. The product has excellent filling power, fast drying and excellent blocking resistance, very good chemical and mechanical resistance. Also in 1K processing good cream and grease resistant (CFB). Very good firmness on vertical surfaces and very good light fastness. Suitable as multi-coat varnish on e.g. oak for neutral wood accentuation. The product contains a special UV filter to protect against premature yellowing and fading. Suitable for the "coat on coat" procedure. Very low VOC content.

Special properties and standards

- Meets the directives of the Austrian ecolabel UZ 01
- Meets the criteria of baubook "Ecological invitation to tender".
- ÖNORM A 1605-12 (furniture surfaces):

Resistance to chemical reactions:

for 1K processing: 1-B

for 2K processing: 1-B1

Response to abrasion: 2-D (≥ 50 U) Response to scratches: 4-D (≥ 1.0 N)

DIN 68861 (furniture surfaces)

Part 1: Response to chemical stress: 1 B

Part 2: Response to abrasion: 2 D (over 50 to 150 U)

Part 4: Response to scratches: 4 D (> 1,0 bis ≤ 1,5 N)

 ÖNORM A 3800-1 (fire behaviour) in conjunction with a flameretardant substrate:

flame-retardant (formerly B 1 acc. to B 3800 -1), Q1, Tr 1

- Cradle to Cradle Certified® Silver certified
- **EN 13501-1** (fire behaviour) in conjunction with a flame-retardant substrate also veneered: B-s1,d0
- DIN 53160-1 and DIN 53160-2 perspiration and saliva-proof properties

05-22 ZKL 2966

ADLER-Werk Lackfabrik, A-6130 Schwaz

Phone: 0043/5242/6922-301, Fax: 0043/5242/6922-309, Mail: technical-support@adler-lacke.com

- ÖNORM EN 71-3 Safety of toys; migration of certain elements (free of heavy metals)
- Suitable for coating children's toys.
- French ordinance DEVL1104875A regarding the marking of construction coating products for their emission of volatile pollutants: A+

Application areas

- One-component: For the coating of furniture surfaces exposed to normal levels of stress (such as bedroom suite and living room furniture, etc.: application areas III to IV according to ÖNORM A 1610-12).
- Two-component: For the coating of furniture surfaced exposed to high levels of stress (such as kitchen and bathroom furnishing, tabletops, etc.: application areas II – IV according to ÖNORM A 1610-12).
- Very good stability for coating vertical surfaces and for profiled workpieces and battens.
- For painting wall and ceiling elements.
- For hardly inflammable or flame-retardant coating systems in conjunction with a flame-retardant substrate.

PROCESSING

Instructions for use

- Please stir the product before use.
- The temperature of the product and object, and the room temperature must be at least +15 °C.
- When coating interior doors, it must be ensured that only sealing profiles compatible with acrylic paints are used.
- Various types of wood (e.g. Larch, various exotic types of wood) contain water-soluble substances, which become active when overcoating with water-based furniture coatings. To prevent discolouration or marks (these can be more or less pronounced depending on the origin of the wood), we recommend priming first with PUR-Primer 25291 for those types of wood.
- If a stronger grain accentuation / higher light protection is desired, for light woods such as Maple or Oak 1.5 % and for dark woods such as Walnut 3 % Aquafix UV 100 8148 000210 can be added to the coating.
- Please observe the relative technical data sheets of the products.
- Please follow our ARL 150 Working guidelines for water-based furniture coatings.

Blending ratio

100 parts by weight Bluefin Unistar 29664 part by weight of Aqua-Crosslinker 8481 000210

Aqua-Crosslinker 8481 must be carefully worked into the coating components by stirring before processing. We recommend observing a waiting time of approx. 10 min. before processing.

Pot life

72 h at approx. 20 °C. After 3 days mixed 1:1 with freshly hardended material. A further extension of the pot life is not possible.

Increased temperatures reduce the pot life.

Application technique

Application method	Airless	Airless air- supported (Airmix, Aircoat, etc.)	Cup gun
Spray nozzle (ø mm)	0.23 - 0.33	0.23 - 0.33	1.8 - 2.0
Spraying pressure (bar)	100 - 120	60 - 90	2 - 3
Atomized air (bar)	-	1 - 2	-
Application quantity per application (g/m²)	approx. 80 - 120 total quantity applied (primer and topcoat) max. 450		

The product is ready to use.

The shape and properties of the substrate affect consumption/yield. Accurate values for consumption must be obtained by applying trial coats in advance.

Drying times

(at 23 °C and 50 % rel. humidity)

Sandable and recoatable		after approx. 2 hours
Manipulable and s	tackable	drying overnight

Lower temperatures and/or high level of atmospheric humidity can increase the drying time.

The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.

Cleaning the working equipment With water immediately after use.

To remove dried paint residues we recommend using Aqua-Cleaner 80080 (diluted 1:1 with water).

Conveyor belts and material lines: Clean-Smart B&P8015000210 Heavily soiled material lines: Clean-Smart Gel 8060000210

Please observe the relative technical data sheets of the products.

	Thease observe the relative technical data sheets of the products.
	SUBSTRATE
Type of substrate	Hard and softwood (solid wood-, veneer-, (coated) chipboard-, wood fibre boards)
Substrate property	The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating.
Preparation of the substrate	Hardwoods: Sand with grit size 150 – 180 and clean. Softwoods: Sand with grit size 100 – 150 and clean.

	COATING SYSTEM	
Primer	1 x Bluefin Unistar Thix 2966	
Intermediate sanding	grit size 240 - 320	
	Sanding straight through must be avoided, as this may lead to differences in the grain accentuation, which are further increased by yellowing with aging.	
Topcoat	1 x Bluefin Unistar Thix 2966	
	CLEANING AND MAINTENANCE	
Cleaning and maintenance	Cleaning with Clean-Möbelreiniger 96490. Preservation with Clean-Möbelpflege Plus 7222.	
	Please observe the relative technical data sheets of the products.	
	ORDERING INFORMATION	
Size of trading unit	4 kg; 22 kg; 120 kg	
Colour shades / degrees of gloss	G05 Naturmatt 2966 000105 G10 Stumpfmatt 2966 000110 G30 Matt 2966 000130 G50 Halbmatt 2966 000150 G70 Seidenmatt (silk 2966 000170 matt)	
Supplementary products	Aqua-Crosslinker 8481 000210 Aquafix UV 8148 000210 Aqua-Cleaner 80080 Clean-Smart B&P8015000210 Clean-Smart Gel 8060000210 Clean-Möbelreiniger 96490 Clean-Möbelpflege Plus 7222000210	
	OTHER INSTRUCTIONS	
Durability / storage	At least 12 months in the original sealed containers.	
	Make sure the product is protected against moisture, direct sunlight, frost and high temperatures (above 30 °C).	
Technical specifications	Delivery 3400 ± 3700 cP (Brookfield spindlel 4/20 UpM/ viscosity 2 min/20 °C)	
Safety-related information	Further information on the subject of safety during transport, storage and handling as well as disposal can be found in the relevant safety data sheet. The current version can be accessed on the Internet at www.adler-lacke.com.	
	The product is only suitable for industrial and professional use.	
	Inhaling paint aerosols whilst spraying must generally be avoided. This is ensured by correctly using a breathing mask (combination filter A2/P2).
